Dr. Eva Dörner

Partner
German Patent Attorney
European Patent Attorney
UPC Representative
Chemist

Eva advises and represents clients in securing, maintaining, enforcing and challenging intellectual property rights in the fields of chemistry, pharmacy and plant protection. In the field of chemistry, she has particular expertise in organic chemistry and organic synthesis. Within the areas of pharmacy and plant protection, her work mainly centers on small molecules, combination preparations and formulations. During a secondment with an international chemical corporation, where her role was that of a patent professional with particular attention to plant protection, Eva became particularly skilled in developing filing strategies. She also spent a period of time with an American IP law firm where she acquired valuable insights into the rules and procedures of US patent law.

REFERENCES

"Eva Dörner is a gifted attorney who knows her field extremely well. She is collaborative, enjoyable to work with and can be recommended without hesitation to anyone working in chemistry or pharma, especially on contentious matters."

- [IAM Patent 1000, 2023](#)

"The collaboration with Andreas Ledl and Eva Dörner has become indispensable for us. Andreas Ledl's level-headed manner and his focus on addressing all involved parties and presenting problems in an abstract way is second to none. Eva Dörner's chemical expertise undoubtedly rivals that of our in-house chemists while always being one step ahead in negotiations with patent lawyers on the other side. Both leave any ego behind and always have the best possible result for their client in mind. I haven't seen it that often."

- [Legal 500 EMEA, 2023](#)
